

Technical Expertise

Coding

Java
Python
HTML/CSS
Sublime
Illustrator

Miscellaneous

Microsoft Office Suite
Wordpress

Projects

2Trainz

A HackNY 2014 winner, 2Trainz used various sensors attached to a toy train to obtain data such as light and temperature. Using JavaScript, HTML, and CSS, the data was displayed on a browser in real time.

Cell Simulation

Using Java, I created a visual representation of a certain specimen's biological cells mutating.

Education
